

ALEXANDRIA. VA WEDNESDAY EVENING OCTOBER 22.

THE PREVAILING impression, on the subject of the census, is that it is the most incorrect one that has ever been taken, and that as an index of the exact number of the people of the country it is entirely misleading. It has been discovered that the chief and real object of taking it was to show an increase in the number of people in republi can districts and a decrease in the number in democratic districts, and to have the enumeration completed in time for the recent session of Congress to apportion congressional representation for next month's election. But the means adopted to attain that vain object, and the consequent burry, threw the whole work into such confusion that it was impossible to do it without the grossest kind of errors-so gross that the enumeration as taken was worse than useless, and its correctness discredited throughout the entire country. False in one place, falso in all, and it has been demonstrated so far as he knows the condition of the demthat it was false to the extent of 200 000 in New York city. No other party than the one with Mr. Harrison as its figure head, and managed by Messrs. Quay, Clarkson, Dudley, Huston and Reed, would have attempted to prostitute the census to the vile purpose of retaining its control of the taxing power and the treasury of the country.

THE STATEMENT of Congressman Bayly Browne's friends that that gentleman did not vote for the Force bill wont do, and should do him no good. If Mr. Browne were to call a neighbor out of his house at night so that another man might shoot him, or were to supply ma ches to the man he knew was going to burn his neighbor's house, would be be acquitted by a jury of his vicinity? Mr. Browne knew that a quorum was all the South-haters needed to emberthen to pass the Force bill, and he voted to make that quorum. After that his V e was not required to pass the bid, and its advocates duin't care whether he vo e for it or not. All they wented him to de was to vote so as to make a quorum and th rany enable them to pass the bid, and the hedd. He voted to supply them with the means without which they could not have succeeded, and by which they did succ.ed. Having done so, it would have been bet er for him, in the opinion of most righ thinking people, to have boldly voted for the passage of the bill.

ALARMED AT the effect the increased price of the recessaries of life, caused by the new tariff bill, is having upon the voters of his district, Congressman Dursey, of Nebraska, has telegraphed to Chairman Quay, of the national republican committee, to order the manufacturers, as pay for whose contributions to the republican election fund the tariff bill was passed, "to quote lower prices for their products and deny that that bill raises prices." He adds that if this be not d no "it will cost thousands of votes in No braska." It isn't probable the manu'actu:ers will obey any such orders, for what did they contribute to elect Mr. Harrison and a republican Congress for, if not for the promise that they would be recompensed by a bil, that would enable them to raise the price of their products?

FREDERICK DOUGLASS made a speech to his race in Washington last night, in which he strove to incite his hearers to more intanse hate for the while people of the South, whom he charged with all manner of crime, than they already entertain, and also said that if miscegenation should prevail, it would be a matter of little or no practical importance except to the particular parties directly interested. If all the white people of the South knew what Langston and Douglass teach their race, that they are the acknowledged leaders of their race, and that they have been told by President Harrison that they will be supported by the whole force of the administration, white republicans in every southern State would be as scarce as hans teeth.

ONE of the reasons the republicans falsely assign for their avowed purpose to pass the Force bill, if permitted to do so, is that by that bill the negroes in the South may be allowed their full representation in Congress. But with inconsistency carried to an absurd degree, the same republicars deny congressional representation to 200 000 intelligent white people in New York city. In other words Mr. Porter, their superintendent of the census, by their command, refuses to put on the census books of New York city the 200,000 names omitted therefrom by his enumerators, which number entitles that Eightb district. The majority of the mem city to an additional congressman.

MR SPEAKER REED'S gavet is inscribed with the word "business," and he says be conducts the proceedings of the U. S. House of Rapre entatives upon "business" principies. Well, the retail merchants of the country say it is a bad rule that wont work both ways, and that if the republican tariff compels them to pay more for an article sustained .- Washington Critic. than they have heretofore paid for it, they must add the increase to the price thereof when they sell it, as business is business. The unfortunate consumer realizes the truth of this, but doesn't appreciate its poetry.

FRED. DOUGLAS says "President Harrison is stepping to the very verge of constitutional limitations," in his efforts to put southern indeed well known that Mr. Harrison is urg- vent their coming to fill strikers' places.

ent in his demands that the Force bill be passed; and in that he has not only stepped to the verge of constitutional limitations, but gone clean over that verge.

GOVERNOR HILL, of New York, says the new tariff bill is the "eum of all villainier." The New York Sun says Governor Hill would make a good President; and so he would. FROM WASHINGTON.

[Special Correspondence of the Alexandria Gazette.] WASHINGTON, D. C., Oct. 22, 1890.

The fact that all the heads of the govern ment departments here are now engaged in preparing their annual reports, has revived the talk about an extra session among those who don't know what they are talking about, as such reports are only made at the commencement of regular sessions. It con tinues to be the general impression, however, that should the elections go democratic next month, there will be an extra session so as to extend the time during which the Force bill, the bill that will prevent a similar result in '92, may be passed.

W. H Barciay, a democrat, has been pension agent at Pittsburg since '87, at which time he gave the requisite bond. As he was an efficient, and honest, and safe official there was no ground for removing him, but to put him to as much trouble as possible, Secretary Noble demanded of him new bondsmen. This demand Mr. Barclay politely, but positively refused to comply with, for the sole reason that he would not put himself to the extra trouble of seeking them. He was removed to-lay, and his place will be given to one of Mr. Q 1ay's followers,

Among the strangers in the city to-day is Col. Martin, a member of the State demo-cratic committee of Virginia. He says that coratic party in his State was never better in any previous campaign; that in severa of the congressional districts there is as yet no opposition to the democratic nominees; that in others where there is opposition i will amourt to nothing, and that in two of the three districts in which the opposition is serious, the 1st and 2nd, he has strong hopes of democratic success. Respecting the 4 h district, be says if Langston be elec: ed nobody need cry, as he will prove veritable boomerang to the republicaus.

Serious Wreck

CINCINNATI, Oct. 22 .- A disastrous collision occurred at 4:45 this morning on the Cincinnati Southern Railway in a tunnel a quarter of a mile north of Sloan's Valley Station. The traics were a north-bound freight and south-bound passenger. In the most hopeless place that trainmen ever met death, the engines of the two trains dashed into each other, and the cars following jammed into each other in a mass. Then came the adied horrow of conflagration. The firemen, a brakemar, an express messenger and a mail agent were killed. The engineer of the passenger train and another hand of the freight train were badly burned. The baggagemaster was injured. No passengers were killed. If any are injured the names have not yet been ascertained. The burning of the trains in a tunnel renders it impossible to clear the track as readily as it could be done on open ground, the smoke and heat preventing men from entering. Transfers will be made until the tunnel can be cleared. There were two mail agents on the train, which one of them is killed is not yet known The initial cause of the collission was a

wreck which occurred last night at Eilhu station. A mixed train was stopping to leave a car and had not yet gotten in mction, when a freight came up in the rear and struck the rear car, causing a serious wreck-Young Mr. Payne, a commercial traveler, had both legs crushed and has since died. The delay to the passenger trains by this wreck caused the mistake of the engineer and conductor of the freight train by which the tunnel collision occurred. Fortunately the passenger train had not entirely gone itto the tunnel when the crash came, and so served as a means of escape for the passen- in its favor.
